Imagine if Your Doctor Knew Exactly What's Going on Inside Your Body...

Now, with DigiTwin®, You Can See Exactly What's Going on Inside Your Machinery

- 20+ Telemetry Data Sensors
- Constant Monitoring for Cause and Effect
- Diagnostics of Every Machine Component

So much more than PLC data reporting that simply increases suppliers' parts volumes. Since 70% of machinery problems are due to filtration and lubrication, DigiTwin monitors all components, all lubrication levels and filter levels to help prevent component failure long before the PLC even knows.

Making You Smarter for Lowest Total Cost of Ownership
